

Toothpick Crosses

You will need:

- black paper
- toothpicks
- something to use to cut or brake the toothpicks (if desired)
- scissors
- white glue

1. Draw a cross onto the black paper. Younger children may need help with this.
2. Have the children fill in a section of the drawn cross with glue and then cover the glue with toothpicks.
3. Then move onto another section of the cross. Do this until the cross is covered.
4. Allow the crosses to dry and then cut them out leaving a small black edge around the outside.
